Assignment 1

Subject : Organizational Behavior & Human Resource Management (CBCS 2019 Pattern)

Issue Date : 02/05/2022

Submission Date : 12/05/2022

Instructions :

1. This is individual and graded assignment
2. There are two questions. You can solve any one question in a notebook or loose sheet.
3. Scan the solved assignment and 'turn in' the pdf file using mmcc.edu.in email account and google classroom.

Question 1

Case study on The Importance of Diversity In The Workplace

Watch the 3 min 12 sec video on the above topic to understand the discussion made for the case study by clicking on the link <https://youtu.be/Pn6WzHw7gHY>

The case study says "businesses that understand the importance of diversity in the workplace are known to perform better both financially and culturally. When employees work with other people from different backgrounds, they have the opportunity to learn from one another to produce higher quality products and services. Having a diverse workplace will also foster a positive working environment in which your employees will grow and thrive".

Think about the case study and answer the following:

1. How can Indian businesses bring diversity to the workplace ?
2. Explain the role of an employee in knowledge sharing, team building and sharing success.

OR

Question 2

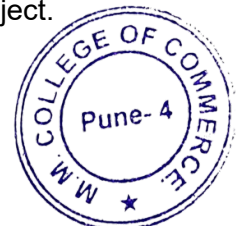

Case study on Understanding Stress and How to Manage It - HealthTexas Medical Group

Watch the 2 min 34 sec video on the above topic to understand the discussion made for the case study by clicking on the link <https://youtu.be/9Hto1HeMrYQ>

The case study says "Understand what stress is and how it affects your daily life. In this video, we will talk about how to manage stress and prevent it from taking a toll on our health".

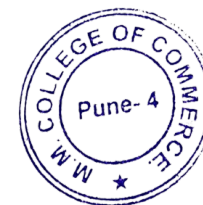

Think about the case study and answer the following:

1. How can Indian businesses ensure the well -being of employees in the workplace ?
2. Explain the role of an employee in ensuring the success of a team / project.

SUB : Business communication

COURSE : FYBBA (CA)

BUSINESS COMMUNICATION

1] What is communication and state importance of communication:

→ The exchange of information, ideas or thoughts from one person to the other or from one end to the other is communication. According to McFarland communication is, "a process of meaningful interaction among human beings. More specifically, it is the process by which meanings are perceived and understandings are reached among human beings." Newman and Summer defined communication as "an exchange of facts, ideas, opinions or emotions by two or more persons."

Communication is the process of passing information from one person to another. The purpose of communication understands of information whatever one wants to say to someone should be clearly understood by him else the very purpose of communication would be defeated.

In an organisation communication facilitates the flow of information and understanding between different people and departments through different media using all the channels and networks. This flow of information is for managerial effectiveness and decision making in general and for human resource

manager in particular as he has to be in contact with the managers of various departments, employees and workers and train union leaders.

Communication thus helps understand people better removing misunderstanding and creating clarity of thoughts and expressions. It also educates people. The communication may be written or oral, formal, informal and upward, downward, horizontal, diagonal, interpersonal, intrapersonal, interdepartmental, intra-organisational.

The communication brings people together, closer to each other. The communication is an important management function. It bridges the gap between them.

Information is the most vital aspect for communication. It is the information which is transmitted, studied, analyzed and interpreted and stored. The manager therefore has to spare time to collect, analyze & store the data and information for decision making and routine day to day business.

* Purpose of communication:

Management is getting the things done through others. The people working in the organisation should therefore be informed how to do the work assigned to them in the best possible manner. The communication is essential

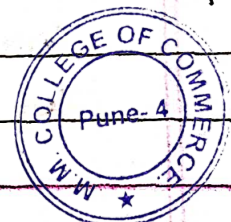

in any organisation.

i. Flow of information: The relevant information must flow continuously from top to bottom and vice versa. The staff at all levels must be kept informed about the organisational objectives and other developments taking place in the organisation. A care should be taken that no one should be misinformed.

ii. Co-ordination: It is through communication the efforts of all the staff working in the organisation can be coordinated for the accomplishment of all personnels and their efforts is the essence of management which can be attached through effective communication.

iii. Learning management skills: The communication facilitates flow of information, ideas, beliefs, perception, advice, opinion, orders and instructions, etc. both ways which enable the managers and other supervisory staff to learn managerial skills through experience of others.

iv. Preparing people to accept change: The proper and effective communication is an important tool in the hands of management of any organisation to bring about overall change in the organisational policies, procedures and work style and make the staff to accept and respond positively.

v. Developing good human relations: Managers and workers and other staff exchange their ideas, thoughts and perceptions with each other through communication.

vi. Ideas of subordinates encouraged: The communication facilities inviting and encouraging the ideas from subordinates on certain occasions on any task, this will develop creative thinking. Honoring subordinates' ideas will further motivate them for hard work and a sense of belonging to the organisation will be developed.

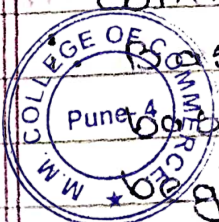

* Importance of Communication:

Effective communication is vital for efficient management and to improve industrial relations. In modern world the growth of telecommunication, information technology and the growing competition in organisations large and small irrespective of their type and kind.

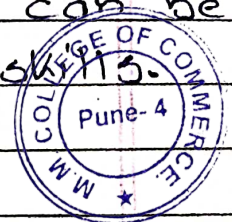

A corporate executive must be in a position to communicate effectively with his superiors, colleagues in other departments and subordinates.

* The followings are some points of Importance of communication:

Reason for action: Communication acts as a reason for any action, starting of any activity begins with communication which brings

- information necessary to begin with.
- ii. Planning becomes easy: Communication facilitates planning. Planning is made easy by communication. Any type of information regarding the human resource requirement of each department of the organisation with their qualification and the types and kinds of job etc.
 - iii. Means of coordination: Communication is an important tool for coordinating the efforts of various people at work in the organisation.
 - iv. Aids in decision making: The information collected through communication aids in decision making. Communication facilitates access to the vital information required to take decision.
 - v. Provides effective leadership: A communication skill brings manager near to his subordinates and exchange ideas and submits appropriate proposals, knows their opinions, seeks advices and make decisions.
 - vi. Boosts morale and motivation: An effective communication system instills confidence among subordinates and workers ensuring change in their attitude and behaviour. The main cause of conflict and dissatisfaction is misunderstanding which can be removed through communication.

Financial Accounting [Assignment]

Name - Siddhi Amol Zaveri

Class - FY-BCOM

Roll No - 120

Div - C

Mobile No - 9145870407

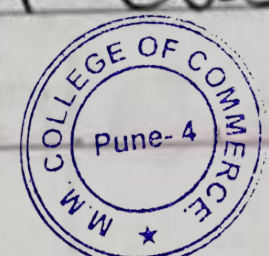

Q1] Explain Emerging Trends in Accounting.

Ans] The Meaning of Emerging trends in Accounting includes going through the process of building in house accounting departments and outsourcing them as well as. Small Scale Companies tend to outsource their accounting departments so that they can focus on the primary functions of the Company. It helps in reducing the cost, reducing the chance of fraud and having access to accounting professionals.

Different types of Emerging Trends in Accounting are as follows:-

① Automated Accounting Process

Automation has already made its way into the accounting industry domain. An ACCA Study predicts that more than 50% of C-level executives in the accounting industry expect automated accounting system across several industries. Also 70% of companies have reported substantial ROI after using automation in their accounting processes. One of the uses of accounting automation is Accounts payable / Accounts Receivable. Accounts payable is what your company owes to vendors in the form of credits. Accounts Receivable is money that your customer owe you on credit.

② Cloud-based Accounting

It is one of the most popular accounting trends that every business wants to adapt to its systems. In a cloud based accounting system, you can maintain your business books online. The data is encrypted, & only people with valid credentials can access it. Benefits of it are

- Ⓐ Data related to your sales or revenue is imported from your bank account to the cloud server automatically.

- Ⓑ You can view your current financial status from anywhere in the world.

- Ⓒ Multi-user access helps you collaborate online with your team members and advisor in real-time.

③ Data Analytics & Forecasting Tools

Data Analytics is not one of the recent trends in accounting but it has become more powerful than ever before. Businesses & accounting firms use such tools for budgeting, tax consulting, risk management & auditing.

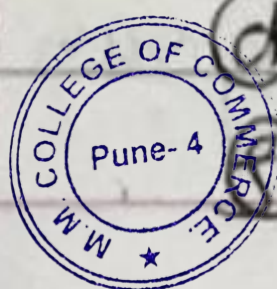

④ Rise of Accounting Software Solutions

The demand for online accounting has grown during the pandemic & accounting software is the best way to do it remotely. Large scale enterprises opt for enterprise Resource Planning [ERP] systems instead of standalone accounting software. Such systems provide enterprises with the following features in addition to an accounting module.

- Ⓐ Procurement
- Ⓑ Order Management
- Ⓒ CRM

- Ⓓ Supply chain Management
- Ⓔ Inventory Management

- Ⓕ Logistics
- Ⓖ Human Resource Management

⑤ Block chain

Block chain is one of the recent trends in accounting due to its direct relationship with ledgers. The primary role of blockchain is to maintain a ledger account containing financial information. It is also responsible for the transfer of the ownership of assets in a secure and verifiable manner. Many people believe that the decentralized nature of blockchain makes it vulnerable to frauds and data manipulation. But it is not correct.

⑥ Forensic Accountancy.

Forensic accountancy is one of the latest accounting trends and techniques and not many people know about it. Forensic accountants belong to law enforcement agencies or private auditing firms that prevent, detect, and investigate financial crimes such as fraud, corruption and money laundering. They have the skills and knowledge in accounting, criminal and civil law and IT.

⑦ Advisory Services.

Industry analysts predict one of the latest accounting trends would be to combine technology and financial advisors. Such a hybrid approach can help accountants get access to deeper insights using analytics. Automation cannot replace humans entirely especially in accounting. However, using advanced technologies in the accounting industry can enhance the service quality of accounting firms. For example, accountants will not have to perform manual and repetitive tasks anymore.

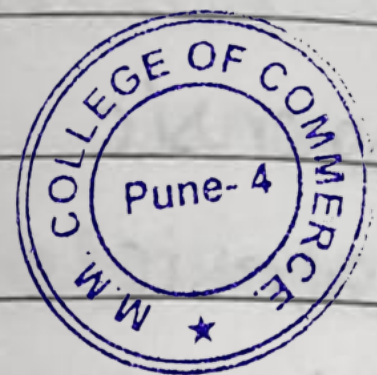

Using technology and advisory services together increases client confidence in data and improves the advice given to them. Taking it a step further, advisory firms can use robotic process automation [RPA].

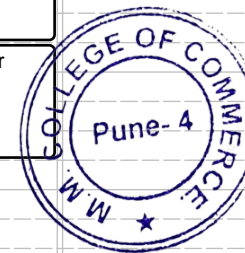

AI to understand client intent in a better way and offer tailored advice.

⑧ Remote Work Setting

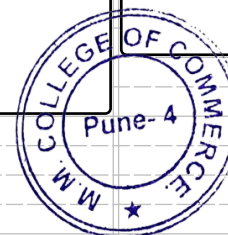

In the Post-covid world, firms are having a hard time recruiting top talents in finance and accounting. They must broaden their candidate search and hiring criteria. Accounting leaders have adapted to the pandemic and caused employees to engage in remote work.
