Subject:-Request for attending Seminar

Respected Sir,

With reference to above subject, BBA(CA) teachers would like to attend State level Seminar on "Technologies that will rule the world in 2020 and beyond" organized by Christ College. The registration fees for the Seminar is Rs300/-. The following teachers will attend the Seminar.

1. Mrs.Nidhi Satavlekar
2. Mrs.Vishakha Wagh
3. Mrs.Meenal Kabra
4. Ms.Komal Dhoot

We request you to sanction amount of Rs1200/- for attending seminar.

Thanking you

Yours Sincerely

Subject: Participation and presentation paper in Dubai 23 and 24 Feb 2019.

Dear Sir,

Thank you very much for giving me an opportunity to represent our college at the international conference on research organized by "Eurasia Research" association united with the United Arab Emirate (UAE) Dubai, held between 23 and 24 February 2019.

I had presented a paper on "Challenges and changes faced by RGB in the digital era" which was well appreciated at this conference.

I incurred the following expenses for attending this conference

| | | |
|--|-------------|-----------------------------|
| 1. Registration for the conference | \$263*74 | Rs 19462 (Invoice attached) |
| 2. Visa plus service charges | \$108.1*74 | Rs 8000 |
| 3. Flight ticket to and fro | \$188.52*74 | Rs 13951 |
| 4. Accommodation and hotel charges for 3 days (283.78*74) | | Rs 21,000 |

TOTAL (843.4*74) Rs 62,413

I shall be grateful to you if you recommend to the management to at least reimburse to me the Registration fees for the conference and the visa process charges which amounts to Rs 27,462 out of the total amount of Rs 62,413 which was spent by me.

Please do the needful.

Thanking you,

Yours faithfully

A Report on Attending a Symposium

**National Symposium on Advancements in Geospatial Technology for Societal Benefits at
Space Application Centre, ISRO Ahmedabad**

Date: 10th Dec 2018

Dr. Sandip M. Anpat

The National Symposium on Advancements in Geospatial Technology for Societal Benefits at Space Application Centre, ISRO Ahmedabad I attended and presented useful topics on Remote Sensing and Geospatial Technology. Since I am associated with group related to ISRO project "CHANDRAYAAN-2" this symposium provided me a full opportunity for practice and constructive dialogue.

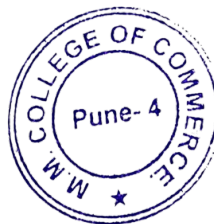

This symposium was an ideal platform for results of my work because it is an ISRO forum, consisting researchers, scientists and NASA representatives who are experts in Space Application. In addition, it was divided into six sessions: Web GIS, Geosciences, Navigation and Mobile Apps, Planetary Sciences, Geospatial Technology and Machine Learning, Hyperspectral Application and Microwave Applications.

The research work that I submitted to the symposium has been allocated in Microwave Application session. The paper was: *Snow cover estimation of microwave SIR-C SAR dataset and its implications on statistical parameters*. The symposium included 35 research groups from all over India to present their recent works in the Space Application. It provided me with a valuable learning experience. For instance, it was an excellent opportunity to gather together, interact and exchange their findings and views during symposium sessions.

Finally, I would like to thank the Marathwada Mitramandals College of Commerce, Deccan Pune for giving me the opportunity to attend the symposium. This symposium was very interesting and enriched my experience with more information, knowledge and confidence.

Expenses paid by me

1. *Registration Fee* : 4000/-
2. *Travelling* :1900/-

ISGNS 2018

National Symposium on Advancements in Geospatial Technology for Societal Benefits and Annual Conventions

December 5 - 7, 2018 | Ahmedabad, Gujarat

Dear DR. SANDIP ANPAT

With thanks, we acknowledge the receipt of your registration for ISGNS 2018. It is a great pleasure for us to have you at "**The National Symposium on Advancements in Geospatial Technology for Societal Benefits and Annual Conventions**" that will be held from December 5 - 7, 2018, Ahmedabad, Gujarat, India.

Abstract:

The microwave remote sensing is exceedingly useful, as it provides synoptic observation of the Earth's surface or planetary bodies. It retrieves the information regardless of day or night and the atmospheric conditions, propagation through ionosphere with minimum loss. This ability has been demonstrated under a variety of topographic and land cover conditions using both active and passive microwave instruments. One of the best active microwave remote sensing technology for imaging system is the Synthetic Aperture Radar (SAR) remote sensing. It has its own energy source for illumination. It receives the radiation reflected from the target on the ground surface. It generates a very high resolution imagery of the Earth or planetary bodies.

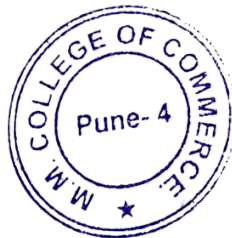

In the present study Snow cover estimation can be obtained by using image classification technique. Because classification has become one of the very important task, after the availability of microwave SAR dataset from the satellites. This techniques is implemented on the basis of Entropy (H), Anisotropy (A) and Alpha (α) based parameters. The classification techniques used in the present work *viz.*, H-alpha, Wishart H α and Wishart H A α classifier. The results of these three classifiers are analyzed and there implications on statistical parameters are compared. The statistical parameters includes Mean (m_a), Median, Standard Deviation (s_a), Coefficient Variance (CV), Equivalence Number of Looks (ENL).

The overall process is applied on microwave L-band SIR-C SAR dataset of Cerro Laukaru, Chile. The dataset is useful for Snow cover estimation, as the large area is covered by Snow, also contains both the Dry and Wet type of Snow. From the literature, it was found that, the accuracy of the L band dataset is better for Snow cover estimation application. Hence, the aim of the present work is to estimate the more accurate, reliable and skillful Snow cover area. The overall processing was done by using PolSARPro Ver. 5.0 software. This software is a European Space Agency (ESA) open source toolbox for polarimetric SAR data processing and education.

In the present work the results of Wishart H Alpha classifier found to better compare to H Alpha and Wishart H A Alpha classifier. There are 5% to 7% difference in between Wishart H Alpha and Wishart H A Alpha classifier for dry and wet snow. The statistical parameters of these results are compared and from that also, it was found that the performance of Wishart H Alpha classification is better compared to the other classification. Hence, in overall class comparison, the Wishart H Alpha classifier shows a better response of classification compare to Wishart H A alpha and H Alpha classifier. Hence from the overall present paper work, it is concluded that the Snow cover estimation of microwave SAR dataset on the basis of statistical parameters analysis is the realistic and novel method.

Key words: Microwave SAR, Dry Snow, Wet Snow, Statistical Parameters.
